

QA Focus – Week 01 Polish Pass

Use the normal QA prompts (docs 05, 06, 07). Paste the matching block below right after the prompt, then the inputs: `GDD_week01_rev3.md` , both Script files, and the polish build. Bug IDs continue the Week 01 numbering with a `P` for polish: CP-P01, BR-P01, ED-P01.

Critical Path (paste after doc 05)

This build is a polish pass. Nothing about winning should have changed.

- Run the verified walkthrough exactly. Every clock value must match `WALKTHROUGH_week01.txt` (W1: 7 to spare; W2: 4). Any different number is P1.
- Confirm GDD 12.1 D3: talking to, asking, or examining Nando at a checkpoint repeats his question, costs no turn, and doesn't resolve the checkpoint.

- Confirm the new win words ("push button" in R1 during ESCAPE) follow the same rule as "down", including the fewer-than-2-secrets refusal.
- Confirm no new command can take a secret, open a puzzle, or pass a checkpoint in a way GDD section 7 doesn't allow. The basin coins in R8 must never be takeable.

Breaker (paste after doc 06)

Focus on what's new:

- **Free verbs:** can `search`, `smell`, `listen`, `hint` or talking to Nando be used to stall, skip, or break a checkpoint or the clock?
- **Strike verbs:** do pull, kick, sit, climb, break, hit or steal add a strike on the four strike objects during TOUR, and never on anything else? Try them on scenery right next to a strike object (bench, keys, lid, fountain, coins, banister).
- **Word collisions:** "place card" vs BRIEFING CARD, "coins" vs GOLD COIN, "door" in R2 vs R6 vs R10, "stairs" in R6 (move) vs "staircases" (examine), "guard" vs Nando.
- **State combinations:** all three animals out; P3 solved before the R2 checkpoint; the coin dropped on the tour; STRIKES=2 then every Don topic.

- **Ladders and rotations:** hint ladders keep separate places; turn feedback and clock-band lines never repeat back to back.

Editor (paste after doc 07)

Five checks beyond the usual:

1. **Noun audit:** read every line of player-facing text in every state. Any noun with no examine reply is P2. Include nouns that appear only inside examine lines (the letter opener, the tire swing).
2. **Landmark table (GDD 12.5):** every landmark in escape text appears in that room's tour text.
3. **Density:** each room has at least one lore nod, one joke, and one sense beyond sight. List any room that falls short.
4. **Repeats:** no line should print twice in one run unless designed to (rotations, rev 2 strike lines). List any accidental repeats.
5. **Guardrails:** GDD section 10's avoid list and the plan's lore rules: no real names of people or cases, no drug names or methods, no heritage stereotypes, no quoted film or song lines, song titles only if public domain.

Misleading or missing text is P2; style is P3.
Include replacement text for every bug, as usual.
